<b>Brief Scope of Work</b> (60 words maximum): PFP will determine feasibility of developing a community-school park on one or more elementary schools within the Los Angeles River Watershed. We will develop site selection criterion, assess feasibility, visit sites, make bilingual presentations to school site councils, community organizations and political representatives. We will also produce a site plan and develop conceptual cost estimates for implementation of feasible sites.			
<b>Funding Source Applied for: Prop. 84, LA River Watershed</b>			
<b>Narrative/Detailed Project Description:</b> The residential areas around priority schools do not have parks within walking distances. Community School Parks create open green space by converting existing playgrounds by planting trees, adding play equipment. The community must be involved in this design process. The rehabilitation of the LA River watershed occurs by reducing storm water runoff, use of porous materials and native landscapes, and recharging local water sources. Ideally, each site shall serve multiple purposes including open space, recreation, best management practices on municipal lands for storm-water management and education about the LA River watershed in Spanish and English.			
<b>Tasks / Milestones:</b>	<b>Budget:</b>	<b>Start Date</b>	<b>Completion Date</b>
1 Site selection criterion	\$10,000	May 15, 2008	July 1, 2008
2 Community Outreach with school site council (bilingual) and other stakeholders	\$10,000	May 15, 2008	Sept 1, 2008
3 Site plan	\$10,000	June 1, 2008	Sept 1, 2008
4 Estimate costs	\$10,000	Sept 1, 2008	October 2008
I certify that the information contained in this Grant Application form, including required attachments, is accurate.
